

Vomitoxin Update

December 15, 2011

Farm Direct

Customers shipping off farm corn using the Farm Direct Program are required to provide an assessment of quality for GLG to determine an appropriate destination.

Corn that cannot make destination requirements will be unloaded at one of our facilities for blending.

Please refer to the Farm Direct program for additional information.

Processor Direct

Customers shipping direct to processor using the Processor Direct should ensure the corn will meet the destination requirements.

Customer can request an alternate delivery point.

Please refer to the Farm Direct program for additional information.

The following table is a temporary amendment to the processors normal quality standard. It is subject to change without notice and is accurate on the date published.

Destination	Maximum Vomitoxin
Hiram Walker	4.9 ppm
Greenfield Ethanol	4.9 ppm
St Clair Ethanol (Suncor)	4.9 ppm
Casco London	3.0 ppm
Casco Pt Colborne	3.0 ppm
IGPC (Aylmer)	4.9 ppm
Nutreco – St Mary’s	4.0 ppm
Nutreco - Stevensville	4.0 ppm
Wallenstien	6.0 ppm
