DON update

Nov 23 2018

I want to thank everyone for their patience s in this year’s harvest. We have been battling hi DON corn and mother nature as we try to get the balance of the crop into the bin and elevator.

We will be receiving Hi DON corn at the following locations effective this morning:

Thamesford, Delhi and Mitchell.

We will receive at no limit DON. We will still continue to test and ensure your corn gets to the proper bin. We are able to segregate at these locations and will move to other locations as we get additional harvest tucked away.

We have updated our discount tables for all locations.

All GLG Locations
